DIRECTOR'S MESSAGE

IRIMEE in its 90th year has undertaken a number of new activities to strengthen all facets of training infrastructure. Some recent developments are as under:

1. Lab activities for SCAs related to Engineering Drawing, Basic Electronics, Data structure, Unix & C, CADD etc. have been started at IRIMEE aimed at improving understanding of basic concepts. Earlier this activity was undertaken at BIT Mesra.
2. IRIMEE has updated its knowledge bank and has provided search engines to help in easy retrieval of information from any of the IR websites like IRIMEE, Production Units, Railway Board, and International Railway Institutes like UIC, TTCI etc.
3. IRIMEE has become a part of the National Knowledge Network (NKN) which has connected it to over 1500 Institutions across the country including all IITs, IIMs and other top engineering and research Institutes. This is enabling sharing of resources of these institutions.
4. Student Chapter of Institution of Mechanical Engineers, London has been opened on 25th April this year. The opening of student chapter will enable access of a large volume of technical data to SCAs and broaden their horizon.
5. M-Tech course in Mechatronics at IIT Patna has been introduced from year 2016 for serving officers. Every year IIT Patna will take 2 sponsored candidates.

Infrastructural facilities both in IRIMEE and Hostels are continuously being improved. A sanitation and housekeeping contract at Yantrik Nivas is now in position. The participation and nomination of trainees in various courses at IRIMEE has increased by better coordination with Railways and timely intimations.

I request Railways for full utilisation of the course-seats and training resources at IRIMEE.
